YT Factory Reproduction List – Update 31st August 2010

I had intended to completely rewrite my introduction, consolidating all previous updates to the YT Factory Reproduction list. However, upon compiling the current position I reviewed the previous issues of the Factory Lists and in my view the updates contain a tremendous insight to the how this project has progressed and developed. I therefore make no apology in leaving them within this document. Those readers who merely want to see the current position can forward directly to the latest YT Factory Reproduction List which shows the position, according to my records at the 31st August 2010.

It is a little over 3 ½ years ago that I issued the last update and I am pleased to inform you that we have now located a further 24 surviving cars making a total of 199 known survivors. When I published the original list in November 2002 with 97 known survivors I said that I thought there could be as many as 200 survivors; we now know this to be fact, as there are at least three other survivors that I have recent photographs but no details. YTs now have a presence in three new countries: Austria, Belgium, and Israel.

It is interesting to note that of the 24 cars ‘discovered’ since the last update in 2007, only one of these was in the ‘thought to have survived’ category; the other 23 are completely new finds. It was always thought that a total of 877 YTs were manufactured and I revised this figure to 891 in 2007. However, in the last three years we have identified further facts, supported by actual cars that place this number at 895. The 199 survivors represents 22.24% of the original production and if we add the 30 ‘Thought to have survived’ cars then this equates to almost 25.6% of cars originally produced.

The YT Factory list now has 144 complete sets of Body Numbers and a further 18 where the first number is known; this number has been obtained from the bulkhead (firewall) where the B282 plate has been lost. The market in relation to YTs has also changed dramatically since I started this venture. I recall reading historical documents comparing a YT to ‘an upside down bath tub on wheels’. If only the author of that document realised that sixty years later that this piece of Sanitary Ware would be commanding higher market prices than its TD Stablemate.

As always I am truly indebted to those owners and enthusiasts around the world who continue to furnish me with information enhancing our knowledge of the MG YT. Without your input we would not have been able to compile these records.

David Pelham
31st August 2010

YT Factory Reproduction List

I have owned a Y Type for almost eighteen years. During this time I have also owned, and still own other MGs. However, the Y Type has always been very special to me. It was this regard for the Y Type that led me to acquiring a couple of YT Stablemates for the Y saloon. It was interesting to see the differences between my YTs and this 'spawned' an even greater interest in this particular model.

As everybody is aware records for the Y Type were destroyed during the 1960s. As a result of the excellent research work undertaken by Dick Knudson, John Lawson, David Lawrence and many others it has been possible to reconstruct many of the records. It is also fortunate that the majority of owners have noted that the Guarantee will cease upon removal of the Guarantee Plate and ensured that it has remained in place. This has been a marvellous source of information for surviving cars.

I have attempted to consolidate all of the information available to date and also obtain additional information from the current owners. This would not have been possible a few years ago, but with the growth of the worldwide web and the flow of information between owners we have moved on to a 'new plateau'. I hope that the Reproduction List will be interrogated by current owners, who will be able to check their own car's details and hopefully furnish me with any omissions, corrections etc. I will update the list regularly and post it on the www.mgytypes.org website.

The list itself is reasonable self-explanatory, however, there are a few 'codes':

All currently "live" cars are listed in **Blue**. At the time of writing (30th November 2002) I have identified 93 YTs that are either running or being restored. This represents over 10% of the cars manufactured. Many of these cars are featured on the Y's on Parade section of the Website and this is the best forum for identifying the status of cars.

Cars that are currently thought to have "survived" are listed in **Red**. It is probable that many of these cars are also "live" but have not been heard of (nor have they been confirmed by me.) for a few years. I hope that anyone who studies the list will be able to confirm that many **Red** entries can be changed to **Blue**.

The “Where Now” column occasionally contains the abbreviation LK indicating Last Known. Other abbreviations in this column refer to the state/county followed by the country. The list shows, at present that of the original 877 cars produced:

184 YTs were exported to Australia and 58 YTs were exported to the USA. I hope to improve upon statistics as more information is obtained.

In addition to those persons mentioned above, I would also like to thank Dave Lawrence (for reviewing the final document), Alf Luckman, Wayne Musselman, Pat Hand and all of those YT owners who have provided information relating to their cars. I would also like to thank, in advance, those YT owners who I haven't caught up with yet, who will undoubtedly provide details relating to their cars.

David Pelham.

YT Factory Reproduction List – Update 31st May 2003

It is now a mere six months since the YT Factory Reproduction List was launched on the Y Register Website. I hoped that people would interrogate the list, identify any discrepancies on the list and fill in some of the many ‘gaps’. The response from Y owners worldwide has been nothing less than fantastic. At the time the list was issued I had identified 93 YTs as survivors, either running or being restored. As a result of the worldwide response I am now able to confirm that there are at least 129 known survivors. In addition to these I have details of a further 44 YTs that are believed to have survived. Surviving cars now total almost 15% of total production and with the ‘believed to have survived’ the total is nearer to 20%. I have received additional information relating to almost 100 YTs. These details have ranged from previously unknown survivors; additional details relating to known cars and even confirmation that certain YTs have been scrapped.

One of the most exciting aspects of the Factory List is the enthusiasm it has produced with YT owners worldwide. We now have ‘live’ cars in sixteen different countries worldwide. Since the original list was produced we have identified cars in India, Ireland, Japan, Malaysia and most recently in Venezuela.

Now a real '**Hot Potato**', all of the records state that 877 YTs were produced. Nobody knows exactly where that number came from, but it has already been written into the history books. The information now available would tend to indicate that the total number of YTs produced was at least 881, and possibly a few more. Why this discrepancy? Well we know that YTs were produced in batches and we have identified new cars that have extended a previously known batch. It appears that CKD (Completely Knocked Down) cars exported to Ireland were not included on the original lists. We have confirmed that B282 Body Plates were not fitted to CKD cars. YT2706 a recently (January 2003) discovered original Irish export CKD car has confirmed this fact. Prior to this discovery YT2744 another Irish CKD was the only known example. It is believed that a total of 16 CKD YTs were built in 1949, we have accounted for 2 of these to date and believe that another 4 are included in the Factory Recreated List. David Lawrence and I continue to research this, but we can say with some conviction, that there were more than 877 YTs produced, albeit only four more at this stage. As the number of YTs is likely to be higher than 877 it also follows that the number of YAs built will be a few less than the 6,158 stated.

I would like to thank everybody for their input into this project and hope that we are able to research new details and continue to recreate more history of these cars.

YT Factory Reproduction List – Update 19th October 2003

It's almost five months since the last update of the Factory records. I am pleased to say that we have had further confirmation of another 9 YTs, making 138 confirmed survivors in total. In addition to these cars I am reasonably confident that most of the other 39 cars that I have listed as probable survivors will eventually be confirmed as survivors. I know that there are a number of YTs out there e.g. two in Florida and another one in Switzerland that I still have no details on. This endorses the possibility that there could be as many as 200 YTs that have survived the last 50 years. In addition to the 9 new cars confirmed, additional information, mainly body numbers have been obtained on many other cars. It is worthy of note that when John Lawson published his book almost 15 years ago, there were only 6 complete sets of YT body numbers. The Factory List now contains 102 complete sets of body numbers and a further 15 where only the first number is known.

In addition to the positive news above I have now included, within the Factory records, another category (shown as 'Plum') confirming 'Scrapped'. It is sad that these cars didn't make it but at least the cars are now accounted for.

Once again I am indebted to all the Y Type enthusiasts who continue to provide details for the Reproduction List. Please keep up the good work and together we will trace all those other YTs that are out there.

YT Factory Reproduction List – Update 17th October 2004

Almost a year has passed since the last update of the YT Factory Reproduction list. We have now achieved a significant 'milestone' in that we have now traced 150 surviving cars, this represents almost 17% of the original production. If we add the further 37 'thought to have survived cars' this would account for over 21% of the original production. An analysis of the 150 surviving cars shows that we have 107 EXRs, 29 EXUs, 5 EXLs, 3 EXRKs and 6 unclassified

During the last 12 months we have been able to confirm a further 12 cars as survivors, bringing the total number of survivors identified since the YT Factory List was reproduced as a staggering 57 cars. We continue to receive information from all around the world: during the year we have identified the earliest known survivor YT/EXU/1923 in Texas, a third surviving EXR/K car in France and most recently the bodyshell of YT/EXL/2991 being auctioned on EBay in Arkansas!

I am pleased to report that we now have 110 complete sets of body numbers and a further 10 where we are missing the second part. We have positively confirmed that a number of additional cars have been scrapped. Clearly I would much rather not report this but it makes our records more complete.

The number of YTs has been firmly established as being 877 for many years. Last year I indicated that this fell short, albeit by a small number, of the actual number of cars. It would appear that CKD cars were clearly excluded from the original numbers and with those cars identified, the true numbers of YTs is likely to be 884. We cannot be certain and this number may well be revised as more information comes to light.

The YT Factory Records were compiled to fill a vacuum in the heritage of our cars. If you know of, or locate others not on the list please let me have details.

I continue to be indebted to all the Y Type enthusiasts worldwide who continue to provide details for the Reproduction List. Please keep up the good work and together we will identify all those other YTs that are out there.

YT Factory Reproduction List – Update 8th October 2005

Another year has passed since the last update of the YT Factory Reproduction list. Last year we achieved a significant ‘milestone’ in tracing 150 surviving cars; at that time I thought that information on further cars emerging was unlikely, how wrong I was! During the last year we have been able to confirm another 13 cars as survivors. It is interesting to note that although two of these cars were previously on the ‘thought to be survivors list’ the others were a complete surprise, indeed two of the cars were not previously known as YTs. Surviving cars now represent almost 18.5% of total (revised – see below) production. If we add the further 35 ‘thought to have survived cars’ this would account for over 22%. An analysis of the 163 surviving cars shows that we have 118 EXRs, 30 EXUs, 5 EXLs, 3 EXRKs and 7 unclassified

Those of you who take time to review the location of YTs will note little difference of the analysis produced last year. A quick glance will show that we have now identified 57 YTs in Australia (8 more than last year) and 43 YTs in the USA (5 more than last year). However, we have only identified three new cars in the USA, as two have been imported, one from Canada and one from the UK. The YT from Canada was one of the unknown survivors and consequently the number of Canadian YTs remains unchanged. The number of YTs in the UK also remain unchanged as a previously unknown Australian car was imported back into the UK.

I am pleased to report that we now have 115 complete sets of body numbers and a further 17 where we are missing the second part. No further cars have been confirmed as scrapped during the year, so this is good news.

Details from the Factory List now indicate that the total number of YTs manufactured was probably 888; that is eleven more cars than the old established figure of 877. As mentioned in previous updates the revised number is partially due to the fact that CKD cars were excluded from the original numbers and we have also had positive identification of some cars that did not appear on the original list. We cannot be certain and this number may well be revised as more information comes to light.

The YT Factory Records were compiled to fill a vacuum in the heritage of our cars. Since the original ‘YT Factory Records were issued we have identified a total of 70 surviving cars. If you know of, or locate others not on the list please let me have details. As always I remain indebted to all the Y Type enthusiasts worldwide who continue to provide details for the Reproduction List. Please keep up the good work and together we will identify all those other YTs that are out there.

YT Factory Reproduction List – Update 3rd January 2007

I have been a little remiss in that it is almost 15 months since the last update of the YT Factory Reproduction list. A number of other priorities have meant that the updated list be delayed. I have also decided to keep details of the previous updates within the list so that we have a 'Diary of Progress'. It is easy to forget the achievements we have all made in tracing YTs.

In 2004 year we achieved a significant 'milestone' in tracing 150 surviving cars and in 2005 we increased that number to 163. It is almost unbelievable that in the 15 months since the number of surviving cars has now increased by a further 12 to 175. Those persons who read the notes annually will note that 4 'thought to have survived' cars have been found and the other 8 located are new cars to the Register.. Surviving cars now represent almost 19.6% of total production. If we add the further 31 'thought to have survived cars' this would account for over 23%. An analysis of the 175 surviving cars shows that we have 132 EXRs, 31 EXUs, 5 EXLs, 3 EXRKs and 4 unclassified

Those of you who take time to review the location of YTs will notice that 75% of the new cars identified this year were in either Australia or the USA. A quick glance will show that we have now identified 62 YTs in Australia (5 more than last year) and 47 YTs in the USA (4 more than last year). The other three countries where YTs resurfaced were India, Japan and the UK. Once again the Internet has played a useful tool in locating new cars; two were found on the EBay auction site!

I am pleased to report that we now have 123 complete sets of body numbers (up 8 on last year) and a further 18 (up 1) where we are missing the second part. After many discussions with Dave Lawrence (Author 'Let There Be Ys') and 'Fountain of Knowledge on everything related to MG Y Types) I am now convinced that the number of YTs produced was 891; that is 14 more than the previously accepted total build. This does of course mean that the total number of Ys (YAs) produced would have been 6,144 rather than the 6,156 previously accepted. Indeed the actual number of YA saloons is fewer than this as a result of the Swiss Special Bodied car. The YT numbers are backed up by actual cars identified and included in the 'Factory List'.

Since the first issue of the YT Factory Records we have identified 82 surviving cars. It is without doubt that many of the 'thought to survive' cars still exist, and perhaps there are still others that haven't surfaced. The Y Register Website and the Y Type 'International' Family of owners have raised the profile of the MG Y Type beyond belief. If you know

of, or locate others not on the list please let me have details. As always I remain indebted to all the Y Type enthusiasts worldwide who continue to provide details for the Reproduction List. Please keep up the good work and together we will identify all those other YTs that are out there.

David Pelham
